

What is LVB?

Laminated Veneer Bamboo is a high-strength engineered product created by bonding together thin bamboo veneers under heat and pressure

Specifications 8 x 14', 2 3/4" thick; standard 10" fingers & 12" pockets. Loads at 56 mats per Super B.

Sustainability Bamboo is one of the fastest growing plants on earth and is harvested in 3-6 years. Bamboo generates 35% more oxygen than an equivalent area of trees. Our plant is located in the middle of our exclusive private 140,000ha growing area. Crocodile Products has FSC Certification, along with BCSI & ISO9001:2015.

Performance Solid Top, Solid Center, and Solid Bottom; with 3 Fingers; in the standard 8 x 14 format. Exceptionally durable and highly resistant to damage from corks or studded chains. Lighter in weight, but very Ground Stable at 1610 lbs only. Lower trucking costs. Fastest 3 ply mat to clean in the industry. Significant Savings in both Time & Money.
